Full evacuation procedure

28

• Overview

> In a case of emergency or crisis situation, in order to allow for the safe evacuation of civilians from a nearby crisis area, a non-combatant evacuation operation (NEO) will be needed.

> This need became explicit in 2006 with the Lebanon crisis during which around 60.000 foreign citizens were evacuated from Lebanon and repatriated safely back to their countries through Cyprus, using the island as a temporary safe location.

> In order to maximize the efficiency and the utilization of all partnering Nation's available resources, including pooling and sharing and even outsourcing transportation assets, a NEO Coordinating Group was established. The goal of the NEO CG is to facilitate the coordination of evacuation efforts between countries.

> The NEO CG provides a centralized platform for shared situational and security awareness, evacuation information, cooperation and de-confliction among participating nations.

• Purpose / Applications

> This software initially designed to provide NEO CG and to any relevant authorities a useful tool, to manage, direct and coordinate an evacuation of their citizens from a place of danger/crisis. It may also be implemented in cases of natural disasters in the region and beyond, which might also result to the evacuation of citizens.

> Potential users can be the NEO CG member Nations, any relevant National authorities (Ministry of Foreign Affairs, Embassy/Consulate personnel at the crisis area), or a National emergency service (Fire department etc). In a wider situation, users can be of different Nations or authorities.

> The software provides a common platform where all users can communicate and share information, regarding personnel location & status, assets and transportation planning, in order to establish a common operational picture (COP) to the lead or coordinating officer/Nation to better coordinate and manage the operation.

> The software has been used successfully during the multinational exercise **ARGONAUT 2019**, held from May 28-30 in Cyprus, organized by the Cyprus Ministry of Foreign Affairs (MFA). Users were the Cyprus MFA, army officers as well as foreign army officers and members of international diplomatic corps of CAN, AUS, AUT, BEL, DNK, FIN, FRA, DEU, ITA, NLD, NOR, ESP, SWE, GBR, USA & EU.

• Future Development

The software will be in constant development. New options and features will be added to better support the needs coming from the users. Some of them are already underway and includes the following:

> Operate on the web (**web application**), having the users to use only their web browser, without the need for any installation, eliminating any compatibility issues.

> Use it **offline** with the ability to update the data once online again.

> Handling the **accommodation** of EPs at temporary safe location.

> Integrated **maps** will inform users of citizens and assets whereabouts, their status and location.

> Live chat messaging to exchange information, photos & documents instantly

> Compatible with the use of **barcoded wristbands**, in order to track & update citizens location & status instantly with the software

> High level of **security**, to protect the user's and personnel's sensitive information.

This software is a beta version and is not ready for publish and/or distribution.

The content and services of the "MULTINATIONAL EVACUATION MANAGEMENT TOOL - HERACLIS" owned by the developer and licensed to Cyprus Ministry of Foreign Affairs (MFA) for a trial period (until 31st May 2019)

• Abbreviations

NEO:	Non-Combatant Evacuation Operation
NEO CG:	Non-Combatant Evacuation Operation Coordination Group
COP:	Common Operating Picture
EP:	Eligible Person
Asset:	Sea, Air of ground recourses (Ships, Airplanes and Buses/Cars) used to transport EPs
Route:	a transportation plan for an asset (location, date & time of departure and/or arrival)
Areas:	Crisis Area (CA) Temporary Safe Location (TSL) Place of Safety (PoS)

Status:

EP status

- 1. At CA
- 2. Processed & Ready at CA
- 3. Assigned to Manifest at CA
- 4. Been Evacuated (Departed) from CA
- 5. Arrived at TSL
- 6. Disembarked & Ready at TSL
- 7. Accommodated at TSL
- 8. Assigned to Manifest at TSL
- 9. Been Transferred (Departed) from TSL
- 10. SAFE at TSL (no need for transfer)
- 11. Arrived at PoS
- 12. SAFE at PoS

Asset status

- 1. En Route to CA
- 2. Arrive and Ready (empty) at CA
- 3. Loaded at CA
- 4. En Route (Departed) from CA
- 5. En Route to TSL
- 6. Arrive and Ready (empty) at TSL
- 7. Loaded at TSL
- 8. En Route (Departed) from TSL
- 9. Arrive and Ready (empty) at PoS
- 10. Available
- 11. Not Available
- 12. Declared an emergency

• Welcome screen

When starting the application a Copyright notice will show up informing about the current user license and the version

• Log in

- On the Log in screen take the following action:
- 1 Enter your Username and password
- 2 Then click [Log in]

If you don't have an active User license, a message box will inform you about <u>limited</u> <u>features</u>*.

*Creating New EP and Asset is disabled

Main Window

Main window consists by **<u>4 panels</u>**

- Top panel: Log out, User info, Crisis area Nation, Developer info, Date, Refresh status
- Right panel: 3 main buttons [Routes, Group Lists, Manifests], Message list
- Left panel: EPs evacuation statistics
- Main panel: 5 tabs [Evacuation Status, Transportation Plans, EPs, Assets, Options]

• Top panel

Quick search/filter options: User can use the fields to select the Nation, Area or Status of the EPs. Also can select an option from the check boxes as to where the search results will apply.

Finally user can type in the Name or Document number of an EP. Selected EPs can be inserted in the Group List by clicking on the arrows

EPs Database Quick search / filter options Notice: Database Nationality 1 Cyprus ٠ E Group List Area : Al • E Both Status : All . Name +. V Apply I Limit results Clear Select EPs Nation [Error] Last Nat Access Deniedt You need higher permition level to perform this action Action is canceled. EPs 0K

Group List of EPs should be created for the following purposes:

- Set the location of EPs
- Change the status of EPs (processed, safe etc)
- Insert EPs into a Manifest

A Group List in order to be visible and selected by other Nation user must be SHARED with that Nation

Privacy:

One Nation user can't select or view other Nations

row, assets arrived but not empty will have a GREEN mark and assets arrived and disembarked (empty) will have a YELLOW mark.	Sector and the sector of the s	Asset: IT-C130				** **			

When an asset arrives at destination, the user must <u>manually click</u> on the green button [**ARRIVED at destination**] and when all EPs have disembarked the user must <u>manually click</u> on the yellow button [**DISEMBARK EPs**]

In order to view or edit an asset details or a route, user can double click over the underline blue part of the row. To view a loaded manifest, user can double click on the green number of EPs.

New Group List of disembarked EPs:

When an asset is disembarked, all EPs on the manifest will inserted into a newly formed group list, shown on the list [Group Lists] with the description "Disembarked EPs at TSL".

Privacy:

User of one Nation can't change the status (arrived/disembarked) of an asset of different Nation

TSL - Departures:

On this page user can over watch all assets planned for traveling from temporary safe location to each Nations place of safety.

Notifications:

Assets currently empty (ready for loading) will have a **YELLOW** mark on the beginning of the row, assets loaded with a manifest will have a **GREEN** mark and assets departed (en route) will have a **RED** mark.

Actions:

When an asset departs from origin, the user must <u>manually click</u> on the red button [DEPART from origin]

In order to view or edit an asset details or a route, user can <u>double click</u> over the underline blue part of the row. To view a loaded manifest, user can double click on the green number of EPs

The procedure of creating, loading or unloading a **manifest** is the same as described before.

Same **privacy** limitation applies also in this page.

Same **privacy** limitation applies also in this page

• Evacuation Statistics

Update of data

If a user has selected automatic refresh, after every change of status of an EP, the left panel of the main window and the graphs of the evacuation status tab will change accordingly. If a time interval for refresh is selected, then the stats will change in every zero countdown occurs.

Either way, when user wishes for an update, can **manually click** on the button refresh on the top right corner of the main window.

• Example of a full evacuation procedure

User actions		
>	Go to [EPs] page and create or Import EPs	16
>	Select [Manage Group Lists] and select new or Import a Group List	11
>	From the [Group List] page, after saving the new Group List, use the EPs database to insert EPs	12
>	From the [Group List] page, set the [EPs status] in the group list as [Processed & Ready at CA]	12
>	Go to [ASSETs] page and create a new asset and then a new route for the asset	18
>	From the [ASSETs] page, set the [Asset status] to [Arrived & Ready (empty) at CA]	18
>	Select [Manifest Lists] and select new or Import a Manifest	13
>	From the [Manifest list] page, select [Group List] of EPs and insert them into the manifest	14
>	Go to [TRANSPORTATION PALNS] and navigate to [CA – Departures]	22
>	Select the Asset and the Manifest from the datasheet lists and load the manifest into the asset	22
>	Open the manifest and export it for distribution	13
>	Set the [Asset status] to [DEPART form origin]	22
>	Navigate to [TSL – Arrivals]	23
>	Set the [Asset status] to [ARRIVED at destination]	23
>	When asset is ready for disembarking, set the [Asset status] to [DISSEMBARKED]	23
>	Use the newly created Group List of disembarked EPs to set their status as [SAFE at TSL] or to accommodate them or for further transportation towards PoS	23
>	Update statistics from the main window top panel (Refresh)	26
